

FTQ-M4XG-S85M-15MD

QSFP 40GBase-SR4, 850nm, multi-mode, MPO, 150m

Description

FTQ-M4XG-S85M-15MD series QSFP+ transceiver can be used to setup a reliable, high speed (up to 40Gbps) serial data link over multi-mode ribbon cable. Maximum link span can reach 150m (over OM4 fiber). This transceiver offer four independent transmit and receive channels. Thanks to module's compact size port density of host device can be archived easily. Casing made fully from metal alloys ensures very good EMI immunity. Module is fully compliant with QSFP+ MSA and IEEE 802.3ba 40GBASE-SR4 specification. MPO connector has built-in two metal pins to ensure proper alignment of fibers.

Host device can access module internal EEPROM memory and DDMI via I2C interface.

Built-in digital diagnostic interface (DOM, DDMI) allows a network administrator to monitor each channel's parameters such as: transmitted and received optical power, temperature, supply voltage and laser current. Those information and data are very helpful e.g. in prediction and prevention of connection failures. A module is available in various dedicated versions, which can be compatible with devices from vendors such as Cisco, HP, Juniper, Extreme Networks, Alcatel-Lucent, 3Com, Linksys and more.
