

FTX-M1XG-S85L-30MD

XFP 10GBase-SR, 850nm, multi-mode, 300m

Description

FTX-M1XG-S85L-30MD series XFP+ transceiver can be used to setup a reliable, high speed serial data link over multi-mode fiber. Maximum link span can reach 300m. Casing made fully from metal alloys ensures very good EMI immunity. Module is fully compliant with XFP+ MSA specification and it is available in two hardware versions:

| Model | Operating case temperature |
|---------------------|----------------------------|
| FTX-M1XG-S85L-30MD | 0~70°C |
| FTX-M1XG-S85L-30MDI | -40~85°C |

Host device can access module internal EEPROM memory and DDMI via I²C interface.

Built-in digital diagnostic interface (DOM, DDMI) allows a network administrator to monitor module parameters such as: transmitted and received optical power, temperature, supply voltage and laser current. Those information and data are very helpful e.g. in prediction and prevention of connection failures. A module is available in various dedicated versions, which can be compatible with devices from vendors such as Cisco, HP, Juniper, Extreme Networks, Alcatel-Lucent, 3Com, Linksys and more.
