Total area 38 300 m²

Manufacturing 28 200 m²

Laboratories 2 100 m²

Offices 2 500 m²

Warehouses 5 500 m²

Polish **producer** in photonics and fiber optic sector

Since 30 years, FIBRAIN has been developing modern infrastructure and connecting people around the globe. Our technological facilities include 4 Fiber Optic Manufacturing Centers, which guarantee the comprehensive product & system portfolio used to build fiber optic networks, in all current technologies.

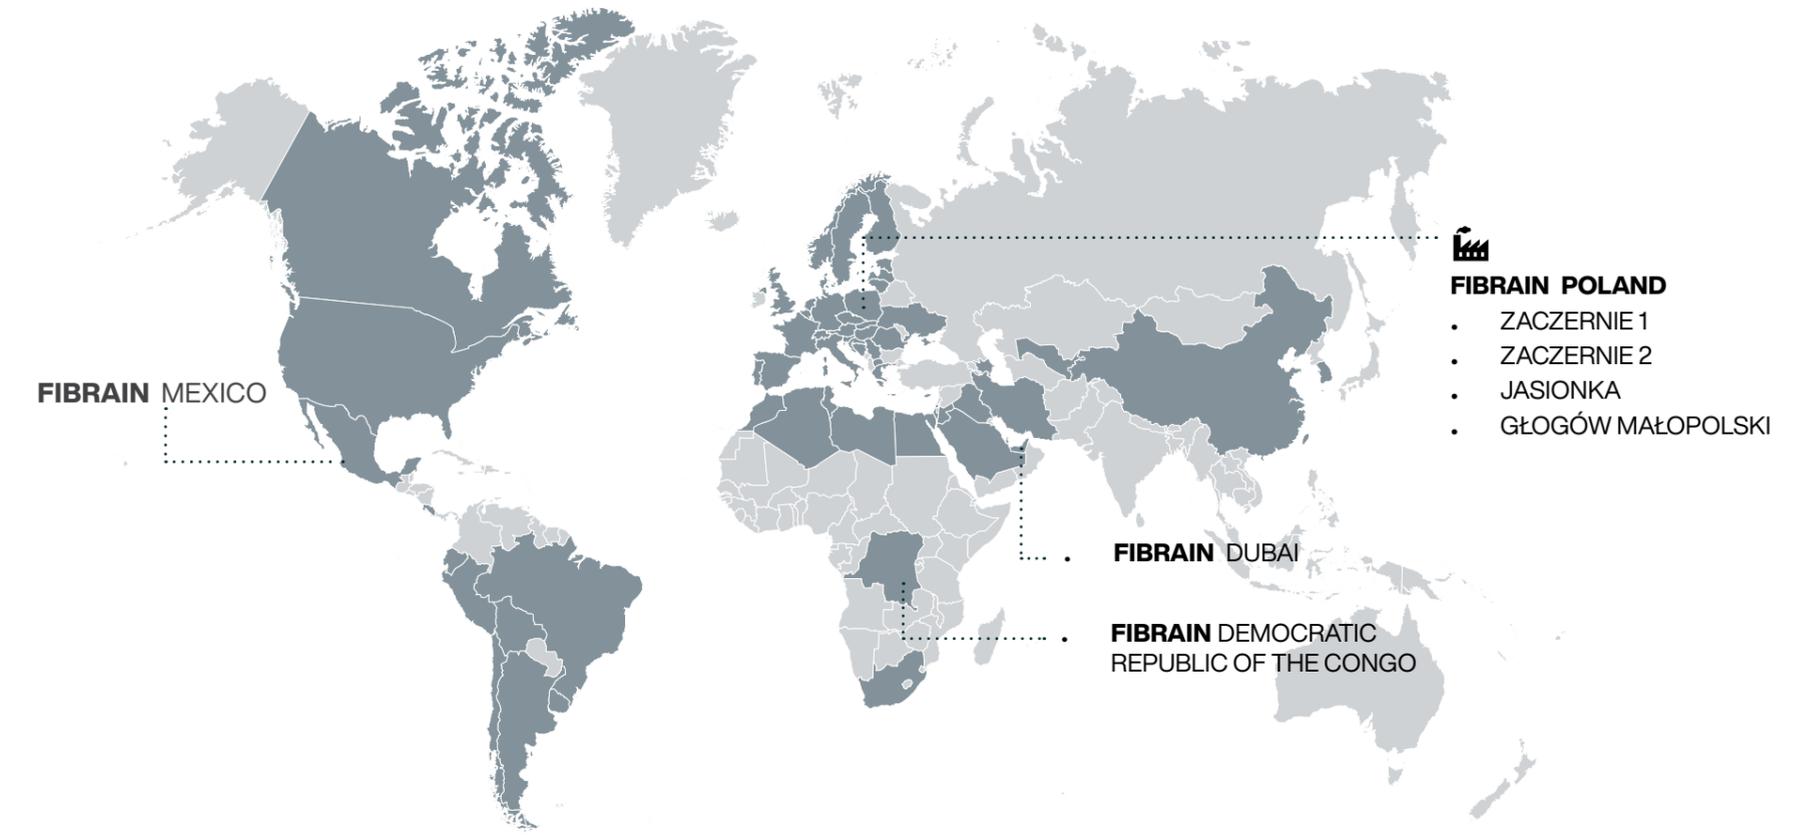

4 manufacturing centers

+80 countries

+700 employees

+10 000 000 connected people

Worldwide presence

We cooperate and sell our products to over **80 countries** worldwide

Wherever solid and safe network is desired FIBRAIN offers its services.

“

What we have learned through years of experience is that every Customer is different, therefore we have to approach every single opportunity individually, and equally at the same time.

FIBRAIN people – the asset like no other

A key element that has contributed to FIBRAIN success are our employees. FIBRAIN aims at creating the best working environment in which each employee feels valued. Our culture is based on mutual trust and true professionalism, respect and support within the team.

„FIBRAIN gives me a lot of opportunities to develop my skills and widen my experience. Professional trainings equip me with essential knowledge which I can use while performing my duties”.

„I have been working in FIBRAIN for many years. This is my workplace where I feel valued and important”.

FIBRAIN methodology is at the core of Corporate Social Responsibility, which are social and environmental responsibilities in the context of sustainable development.

Taking responsibility for the environment

FIBRAIN protects ecosystems and natural resources, by taking wide range of actions and intensive efforts, such as:

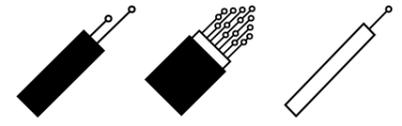

- minimising pollution
- minimising the production waste
- using materials and components that are not harmful to the environment
- recycling
- obeying implemented environmental management system ISO 14001: 2015

More than 2000 cable types
+100 000 km cables per year

FOC Manufacturing

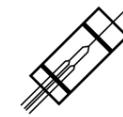

Our unique technological base makes it possible for us not only to manufacture optical cables meeting the highest current market requirements, but also to create and manufacture innovative installer and eco-friendly cables for future applications. The factory itself has been designed with ecology and energy efficiency in mind – the handling and loading processes are greatly optimized and so is the internal usage of packaging.

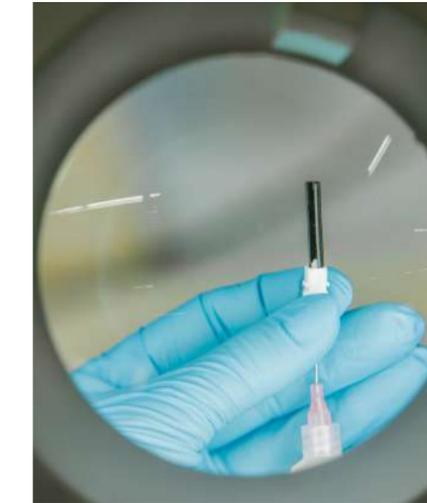

5 R&D Depts
+Highly-qualified
specialists in the fiber
optic sector

Powerful knowledge and expertise

Producing even the most specialized cables is possible as FIBRAIN offers complete product portfolio and has extensive manufacturing capabilities. All products are meticulously tested and undergone series of tests including optical, climatic and mechanical in our Laboratories.

Our R&D in-house department is formed by motivated team who cooperates with renowned universities and participate in various projects aiming at creating and then launching innovative solutions for fiber optic market. Such projects have always been and still are successful because our professional team and best-in-class laboratory, which is being developed on an ongoing basis, form together a perfect combination of skills and innovations.

Cutting-edge
equipment
and highly qualified
experts in the fiber
optic sector

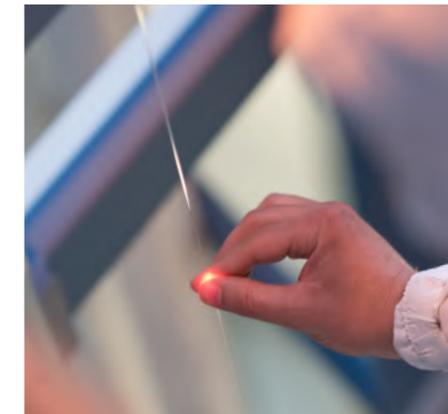

We commit ourselves to provide world-class products which effectively and efficiently meet the needs of our customers.

Focus on innovations in advanced technologies

Developing innovative ideas aiming at creating our better future is our ultimate goal and desire. Upon customer request we can produce or adjust each solution to individual needs.

We are fully vertically integrated, manufacturing own fiber, cables, patchcords and connectors, as well as passive optic elements or metal and plastic items, including panels, outlets, and enclosures.

The biggest producer of FO equipment in Europe
