

## **INFORMATION ON RECYCLING WASTE ELECTRONIC AND ELECTRICAL EQUIPMENT**

The following information is intended for users of electrical and / or electronic equipment. Please pay attention to this information to ensure environmental protection and your own safety.

In accordance with Directive 2012/19 / EU of the European Parliament and of the Council of 4 July 2012 on waste electrical and electronic equipment (WEEE) and the Act of 11 September 2015 on waste electrical and electronic equipment (Journal of Laws 2015, pos. 1688, as amended) waste electronic and electrical equipment marked with the symbol below cannot be disposed of with other household waste. The symbol for separate segregation of electrical and electronic equipment shows a crossed-out wheeled waste container:

Electronic and electrical equipment marked with the above symbol should be recycled again. Used appliances with this marking should be returned to its manufacturer / importer / supplier or to collection points for used electrical and electronic equipment. The above marking also means that the equipment was placed on the market after August 13, 2005.

Waste electrical and electronic equipment is not only often dangerous waste for the environment, which may contain substances, mixtures and hazardous components, but also a material from which valuable raw materials such as iron, copper, tin, glass, and even gold and silver can be recovered.

Appropriate handling of waste electrical and electronic equipment will protect the natural environment and human health from negative consequences resulting from the possibility of being present in the abovementioned hazardous ingredients equipment.
