Description

FTH-S01T-B23Y-010D series QSFP28 transceiver can be used to setup a reliable, high speed (up to 100Gbps) serial data link over single-mode fibers. Maximum link span can reach up to 10km. This module is commonly used in today's datacenter interconnections and high-speed cores of computer networks over long distance. Transmission is established over one fiber, where one CWDM channel. Outstanding immunity to EMI interferences (thanks to case made from metal alloys) and great overall performance allows for deployment of high port density systems. Casing made fully from metal alloys ensures very good EMI immunity. Module is fully compliant with QSFP28 MSA and IEEE 802.3ba 100GBASE-LR specification. Host device can access module internal EEPROM memory and DDMI via I2C interface. Built-in digital diagnostic interface (DOM, DDMI) allows a network administrator to monitor each channel's parameters such as: transmitted and received optical power, temperature, supply voltage and laser current. Those information and data are very helpful e.g. in prediction and prevention of connection failures. A module is available in various dedicated versions, which can be compatible with devices from vendors such as Cisco, Juniper, Alcatel-Lucent and Huawei.

Applications

- 100GBASE-ER1 & 100G Ethernet
- Telecom networking
- Data Center

QSFP28 Transceivers

Key features

- LC Simplex connector
- Transmission distance up to 10km*
- Supports single 53,125GB optical lane
- Supports 106,25Gb/s aggregate bit rate
- Fully compliant with QSFP28 MSA and SFF-8661, SFF-8636
- Hot-Pluggable
- RoHS-6 compliant
- Class 1 laser safety
- Low power consumption (4,5W)
- Metal case for low EMI
- Operating case temperature: 0~70°C

Specification

Supported transmission technology
Ethernet

Speed supported for Ethernet technology
106,25Gbps

Speed supported for Fibre Channel technology
-

Transmission medium
Single-mode fiber 9/125µm

Transmission distance*
10km

Receptacle type
LC Simplex

Wavelength
TX: 1271nm; RX: 1331nm

Output power
+0,7dBm~+4,7dBm

Receiver sensitivity
-6,1dBm(OMA)

Power supply voltage
3,3V

Power Dissipation
4,5W

Operating environment – temperature
0~70°C

Operating environment - humidity
15~85% non-condensing

Dimensions
Compliant with QSFP28 Multi-Source Agreement

* - transmission distance depends on optical link attenuation
